The School of Medicine of V.N. Karazin Kharkiv National University

The School provides training in Medical Practice licensing its graduates as doctors.

The School of Medical Sciences was one of the first four schools of the newly founded University. The development of the School comprises two periods. The first period continued up to 1920, the second started in March 1993, when the School of Fundamental Medicine was again opened at the University.

The School of Medicine of V.N. Karazin Kharkiv National University

The School's faculty includes 22 doctors of sciences, full professors, 68 candidates of sciences, associate professors and instructors.

The School of Medicine of V.N. Karazin Kharkiv National University

Over 1080 students including 700 from other countries study here. Recently, our multinational faculty was replenished by 19 students from India.

Training is provided at the facilities of the University Schools and Kharkiv research and medical institutions. The School focuses its research on the modern problems of theoretical and clinical medicine. Since 1995, the School has published the School of Fundamental Medicine Journal in English, in 2002 reorganized into the Kharkiv University Bulletin: Medicine.

The School of Medicine of V.N. Karazin Kharkiv National University

The School of Medicine of V.N. Karazin Kharkiv National University

The School is organized into 8 Departments:

- Department of surgical diseases
- Department of internal medicine
- Department of general practice-family medicine
- Department of general and clinical immunology and allergology
- Department of general and clinical pathology
- Department of paediatrics
- Department of obstetrics and gynaecology
- Department of hygiene and social medicine

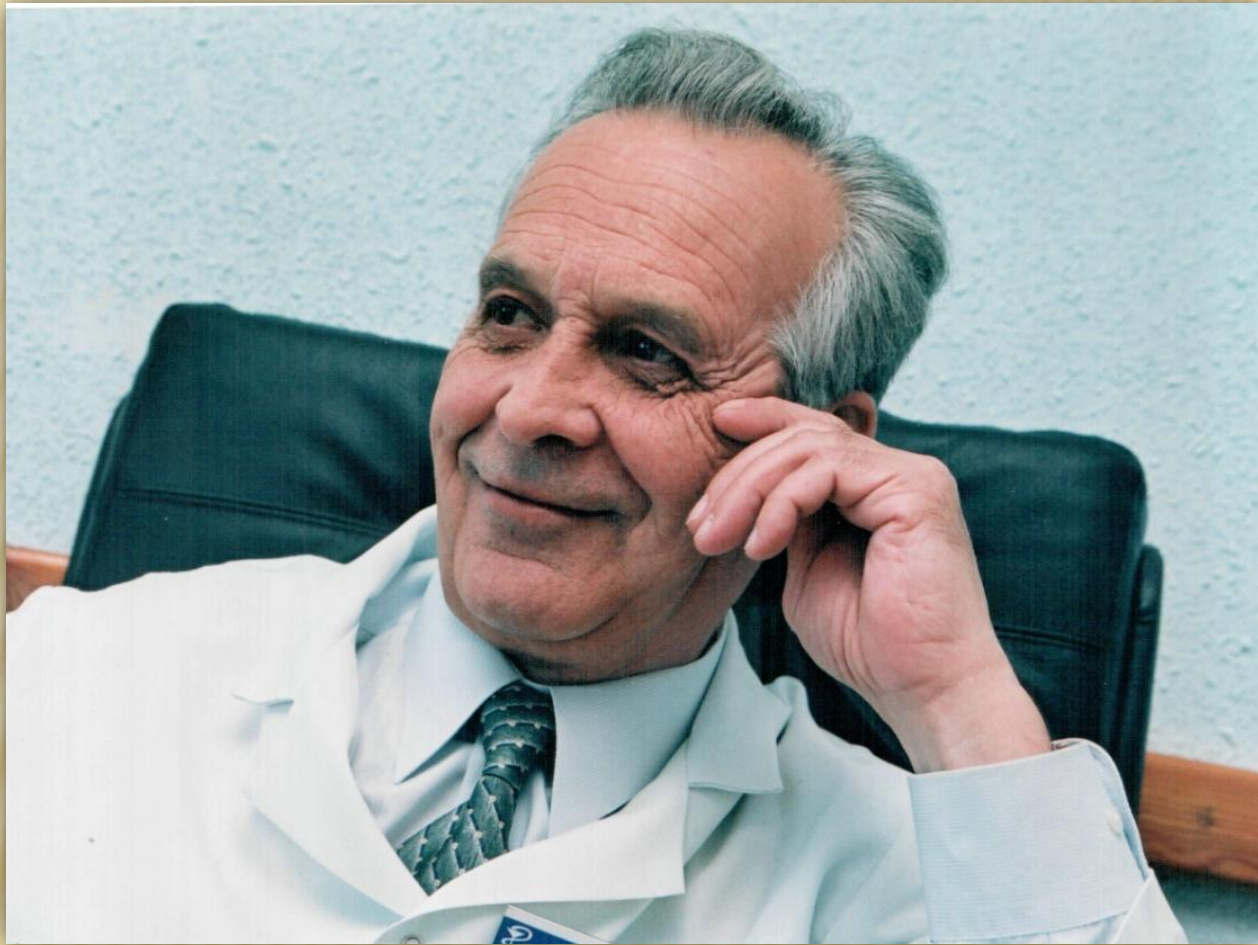

Department of surgical diseases

Areas of research: surgical gastroenterology and laparoscopic surgery.

Department of surgical diseases

Head of the Department: Yevhen D. Khvorostov, doctor of Medicine, Full professor.

Department of surgical diseases

Each year, the department trained more than 400 students, many of whom are foreign nationals. Graduating students have a high level of vocational training and a comprehensive approach to solving patient's problems. Today, our former students successfully work not only in Ukraine but also in countries near and far abroad.

Department of internal medicine

Areas of research: philosophical problems of clinical medicine; best management of patients; neurocardiology; biomechanics of the blood-circulation system; clinical functional diagnosing, and forensic medicine.

Department of internal medicine

**Head of the department:
Mykola Ivanovych Yabluchanskiy PhD (Medicine), Full
Professor.**

Department of internal medicine

The Department is one of the leading in Ukraine and abroad as for the educational process. From the earliest days of its establishment, the work of the Department was based on the approaches of modern modular system, which is sequential from first to last day of training at the Faculty; teaching of Propaedeutics is based on syndromic principle, which today is common to all medical schools of medical profile; and from the very beginning, internal diseases are taught instead of faculty and hospital therapy, that nowadays also takes place in all medical faculties of the country; in teaching process in addition to conventional approaches, the latest computer technologies are widely used; the students participate in preparing of scientific and medical documentation from textbooks to lectures and so on.

Department of internal medicine

The Department is one of the leaders of national and world therapy. The Department is one the first founders of the international virtual Internet scientific conferences in the world; the Department staff are the members of editorial boards of 7 scientific publications and are the organizers of 11 scientific conferences of different levels; significant number of scientific, scientific and methodological, methodological and educational works are published, including textbooks and manuals.

Department of general practice - family medicine

Areas of research: methodology of clinic-population investigations, groups of risk for detection of high-level risk contingent, detection and modification of pathological changes of persons with the high level of risk of health and correction of risk factors.

Department of general practice - family medicine

**Head of the department:
Eugenej Ya. Nikolenko, PhD (medicine), full-professor,
academician of the Ukrainian Ecological Academy of
Sciences.**

Department of general practice - family medicine

Lectures and practical courses:

- medicine of catastrophes
- basic of medical studies
- civil defense
- occupational diseases
- rehabilitation and aesthetic massage
- therapeutic physical training
